

## **Guidelines—Preparing Poster Presentations for the 19<sup>th</sup> International NDTE of Wood Symposium**

The maximum size for each poster is **100 cm (39 in.) wide by 150 cm (59 in.) high** (see schematic below). Include a title, presenter's name and address, abstract, key points, conclusions, and important supporting visuals such as charts, tables, diagrams, or photographs. To create a visually effective poster, minimize the amount of text and number of visuals. During this session, attendees browse among the presentations and speak directly with presenters. The poster session is informal, conversational, and highly conducive to the interchange of information between audience and presenter. It is recommended that each presenter bring copies of a small version of the poster to the booth for distribution.

100 cm (39 inch) wide

150 cm (59 inch)  
high
