

19th International Nondestructive Testing and Evaluation of Wood Symposium

September 22 - 25, 2015

Rio de Janeiro - Brazil

abendieventos.org.br/wood_symposium

About Event

The 19th International Nondestructive Testing and Evaluation of Wood Symposium is a forum for those involved in nondestructive testing and evaluation of wood, wood-based materials and products. It will bring together the international nondestructive testing and evaluation research community, users of various nondestructive testing technologies, equipment development and manufacturing professionals, representatives from various government agencies and other groups to share research findings and new nondestructive testing products and technologies.

Objective

The objectives of this symposium are:

1. To provide the international nondestructive testing and evaluation of wood research community a venue to present results from their latest research and technology transfer activities;
2. To capture, through the symposium's proceedings, their findings and make them available to scientists and engineers from around the world.

History

The first symposium in this series was held at the USDA Forest Products Laboratory (FPL), Madison, WI, USA in 1963. Subsequent symposia were held in the USA until 1996. Since 1996, it has been held at various sites in Asia, Europe, and North America. We are proud to welcome you to South America for the 19th International Nondestructive Testing and Evaluation of Wood Symposium, hosted by the College of Agricultural Engineering (FEAGRI), University of Campinas(UNICAMP).
